

Kitchen Science

Make a Bubble Snake

What you need:

- A plastic bottle
- A piece of cloth
- An elastic
- Scissors
- Dish detergent
- Water
- Tray or bowl for bubble solution
- *Optional* - Food coloring or watercolor paint (Please note, food coloring and watercolor paint may stain.)

What you do:

1. With the help of a grown up, cut off the bottom of the plastic bottle
2. Then cut a round piece of fabric
3. Place the fabric circle onto the bottom of the bottle
4. Use an elastic to hold it in place
5. Remove the cap from the bottle
6. Using a bowl or shallow container, mix one part dish detergent to four parts water to make your bubble solution
7. Dip the fabric end into the bubble solution
8. Hold onto the elastic and fabric and slowly blow on the opposite end and watch as the bubbles begin to grow and froth.
9. Experiment further by adding food coloring or watercolor paint to the fabric
